

Name	Description and Comments	Age Group
<p>Mohamed Gad el Hak - Large Scale Disasters</p> 	<p>An informative book focusing on aspect of why disasters happen and the different types of disaster.</p> <p>The book is full of useful facts and figures, perfect for writing a case study of a certain disaster. Some technical information which can be hard to understand. But a great read.</p>	<p>Adult</p>
<p>Horrible Geography – Stormy weather</p> 	<p>Gives a great understanding of the weather with some funny but informative cartoons and graphs.</p> <p>A great read for anyone with an interest in the weather with some fun facts and real life examples of severe weather.</p>	<p>All Ages</p>

<p>BULLETPPOINTS – Weather and Climate</p> 	<p>A very good reference book with bullet pointed facts about the weather. Diagrams are also used to further in understanding the weather.</p> <p>The book deals with every type of weather from a winter storm to a drought, with many short snappy and understandable notes.</p>	<p>Junior</p>
<p>Teach Yourself – Weather</p> 	<p>A book helping you to interpret weather data and set up your own apparatus to monitor and forecast the weather.</p> <p>A great read with some very good points on how to forecast the weather. The book was understandable and easy to read.</p>	<p>Adult</p>
<p>Eye-witness companions – Weather</p> 	<p>Covers every aspect of the weather with detailed diagrams and analysis. The book is full of picture references and would be great for case studies.</p> <p>A fantastic book with many great pictures and good material. Nearly everything you could want to know about the weather is in here.</p>	<p>All Ages</p>

<p>Usborne spotter's Guides – weather</p> 	<p>Gives a basic level of understanding regarding the weather and how it works.</p> <p>Some great picture's with simple diagrams which helped me understand a lot better.</p>	<p>Junior</p>
<p>Philip's – Guide to weather</p> 	<p>Gives a high level of understanding about the weather with some technical but understandable graphs and illustrations.</p> <p>Some great case study material near the back of the book for places around the world. A great read.</p>	<p>Teenager+</p>
<p>Usbourne – Weather</p> 	<p>Basic level of understanding about the weather, good book for beginners but nothing in depth.</p> <p>Great book for someone starting out with the weather. I t contains some good facts and nice illustrations.</p>	<p>Junior</p>

<p>Rebecca L. Johnson – Understanding Global warming</p> 	<p>Shows the data showing why we should cut CO2 and what countries around the world are doing to cut their emissions.</p> <p>Good book but doesn't give alternatives to the global warming theory e.g. sun spots. Still a great read on the topic of CO2 caused global warming. Some good case study material in this book</p>	<p>All Ages</p>
<p>Eye wonder – weather</p> 	<p>Fantastic picture reference book with small snappy paragraphs on each page which draw the eye.</p> <p>Some fantastic pictures in this book with diagrams. Very easy to understand.</p>	<p>All ages</p>
<p>100 things you should know about the weather</p> 	<p>A great fact book which is accurate and fun. The book also gives you the understanding of being able to interpret weather charts and equipment used.</p> <p>Some surprising facts which I never knew, which made the book fun to read.</p>	<p>All Ages</p>

Usborne – Weather and climate change

Gives you an overview of all weather types from what's happening in space to the weather on the surface.

I liked this book because it showed the oceans role in how the weather works and what goes on to make the weather processes occur.

All Ages

See for yourself – Water

This book shows you the ocean's role in the weather and everybody's lives.

A different angle on the weather which makes the book interesting and informative. There are also some very interesting facts in the back of the book with a timeline of water.
