Thunder and **Lightning**
(to the tune of 'Pop Goes the Weasel')

When a storm begins in the clouds,
it sometimes may look frightening.
You see a quick electrical spark -
Flash! goes the lightning!

Long and thin and streaky and fast,
it's glow is oh so brightening.
Watch for the electric spark -
Flash! goes the lightning!

When a storm begins in the clouds,
it truly is a wonder.
You hear a rumble loud in the sky -
Clap! goes the thunder!

Lightning bolts are heating the air,
over clouds and under.
When the air expands enough -
Clap! goes the thunder.
