Understanding weather charts

Worksheet 1 - extension exercise

The following diagram shows a series of plotted pressure values. If working on a PC, print out a copy of this page before completing the diagram by drawing on the appropriate isobars. Draw your isobars at intervals of 4 millibars, including 992, 996, 1000, 1004 and 1008.

If you need help refer back to Part A - Isobars, pressure and wind.

What to do next

Now you can go on to Part B - Identifying pressure systems and fronts.
