

# Our Solar System

True or false.

	True	False
The moon goes round the Earth		
The sun goes round the Earth		
The Earth is a sphere		
The moon is the same size as the Earth		
From Earth the moon looks about the same size as the sun		
The sun is further away from the Earth than the moon		
The Earth spins on an axis		
Calendar months are different lengths because the moon moves at different speeds
