

# Anticyclones, Depressions and Fronts

## Worksheet 3 - Cross-section of a Depression

If working on a PC, print out a copy of this page. Then, in the space below, construct a cross-section through a classic depression. Your cross-section should include all of the following:

- Warm front
- Cold front
- Warm sector
- Areas of precipitation
- Areas of convective cloud
- Areas of layer cloud
- Temperature profile

If you need help refer back to Part D - Depression cross-section and weather sequence.

### **What to do next**

Now you can complete worksheet 4.
