

SCORE	1	2	3	4	5
	Beginner	Fair	Competent	Strong	Expert
(A) Impact	Not very stimulating. Either not enough detail (too general), or making the exhibit too fussy (too much detail) so the messages are lost to the audience. No clear research questions answered (brain dumping!)	Not very stimulating, but the information presented is clear and not too fussy - messages are obvious. Neat exhibit but not presented in an unusual or creative way (presentation is predictable). Clear research questions, but have they been answered?	Good use of presentation tools to stimulate audience and showcase messages. Neat and well presented, though nothing unusual or original overall about presentation. Research questions clear and have mostly been answered.	Good and creative use of presentation tools to stimulate audience which helps a person to understand the messages and their implications. Some original ideas; research questions answered.	Very stimulating and effective presentation. Original and creative ideas have been used to present their research. May be interactive. Research questions clear and answered competently, making the audience consider wide climate change indicator issues.

(B) Information Quality	Information is not always relevant. Not suitable for audience (too much information or too difficult to understand). Information (and/or text/grammar) is not accurate. Some key facts about their climate change indicator have been <u>generally</u> described with no thought to tackling its impacts.	Information is fairly relevant. Content is suitable for audience, but may be too much or too little of it. Spelling/grammar (if relevant) is ok. Key facts about their climate change indicator have been described more fully, though still with no thought to tackling its impacts.	Relevant and clear information which is suitable for audience. Spelling/grammar (if relevant) is good. Key facts about their climate change indicator have been described very well, and a little thought to tackling its impacts is demonstrated (though very generally).	Relevant and interesting information, easy to understand. Spelling/grammar (if relevant) is very good. The purpose of the presentation is easily identified. Key facts about their climate change indicator have been described very well, and thought to tackling its impacts is demonstrated clearly.	Relevant, interesting information presented, <u>perhaps using unusual sources</u> . Information is clear and helps understanding. Spelling/grammar (if relevant) is very good. Key facts about their climate change indicator have been described very well, and thought to tackling its impacts is demonstrated clearly.
