'The Rates Of Sea Level Rise'

a) Roughly: \[
\frac{51 - 4}{2010.5 - 1993} = 2.6857 = 2.69 \text{ mm/year}
\] (3)

b) Roughly: \[
\frac{84 - 0}{2018 - 1999.5} = 4.5405 = 4.54 \text{ mm/year}
\] (3)

c) Global sea levels are rising at a faster and faster rate. (1)
