

'There Is No Planet B'

a) $360 \times 0.09 = 32.4^\circ$ (2)

b) $100 - 12 - 12 - 9 - 2 - 16 - 11 - 2$
 $= 36$

$7 + 3 + 8 = 18$

$18 = 36 \div 2$, therefore the actual ratio of percentages is:

14: 6: 16

Now work out angles:

Enteric Emissions: $360 \times 0.14 = 50.4^\circ$ Methane and Paddy Fields: $360 \times 0.06 = 14.4^\circ$ Manure and
 CH_4 : $360 \times 0.16 = 57.6^\circ$ (3)
