

**Name:**

**Date:**

1) Draw a table in your book, or make one on the computer using the example below as a guide - you will need to adjust the number of rows depending on the number of areas in your school.

2) Fill in the left hand column with the names of the classrooms and other areas of your school.

2) Interview 10 students from the highest year group at school which they think are the 5 warmest rooms in the school. Fill in their name at the top of a column and put a tick in the correct box to mark the locations they suggest.

<b>Location</b>	name	name	name	name	name	name	name	name	name	name
Hall										
Library										

**Are people in agreement about which some of the warmest areas of the school are?**

**Were people able to suggest reasons that these particular rooms or spaces were so hot?**

**How could you present or display your findings effectively?**
